Message from the Collection Editors

Dear Colleagues,

This Topical Collection “Feature Papers in Biophysics” aims to collect high quality research articles, short communications, and review articles in all the fields of biophysics. We encourage Editorial Board Members of the *Biophysica* Journal to contribute papers reflecting the latest progress in their research field, or to invite relevant experts and colleagues to do so. Topics include, but are not limited to structure, dynamics and interactions of biomolecular systems (experimental, theoretical and simulation), single molecule biophysics, cell biophysics, biophysical methods (experimental and computational), bionanomaterials, molecular machines, synthetic biology, quantum biology and bionanotechnology.

Prof. Dr. Ricardo L. Mancera

Dr. Paul C. Whitford
