## CRISPR-Powered Biosensing

Guest Editors:

### **Dr. Zhiheng Xu**

Department of Industrial and  
Systems Engineering, Rochester  
Institute of Technology,  
Rochester, NY 14623, USA

### **Prof. Dr. Xiong Ding**

Department of Nutrition and  
Food Hygiene, School of Public  
Health, Southeast University,  
Nanjing 210009, China

### **Dr. Kun Yin**

School of Medicine, Shanghai  
Jiao Tong University, Shanghai  
200025, China

Deadline for manuscript  
submissions:

**closed (31 October 2023)**

### **Message from the Guest Editors**

Dear Colleagues,

CRISPR/Cas technology won the Nobel Prize in Chemistry in 2020 for its outstanding contribution to gene editing. In addition to its application in gene editing, a large literature shows that CRISPR/Cas technology has outstanding advantages in biosensing, with high accuracy, good specificity, and fast response. More importantly, CRISPR technology is promising not only in its application to nucleic acid detection but also in the detection of other kinds of biomarkers, including heavy metal ions, small molecules, peptides, and proteins, posing a great application potential for next-generation diagnostics, agriculture, and environmental monitoring. Therefore, this Special Issue aims to present cutting-edge fundamental and applied research activities in CRISPR-driven biosensing, showcasing innovative technologies, methods, and novel integrated devices for next-generation diagnostics, agriculture, and environmental monitoring. We invite submissions that will help to advance research in the field of CRISPR-driven biosensing technologies.

# Special Issue

an Open Access Journal by MDPI

## Editor-in-Chief

### **Prof. Dr. Giovanna Marrazza**

Department of Chemistry "Ugo Schiff", University of Florence, Via della Lastruccia 3, 50019 Sesto Fiorentino, Italy

## Message from the Editor-in-Chief

*Biosensors* is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Chemistry, Analytical) / CiteScore - Q1 (Engineering (miscellaneous))
