### **Message from the Guest Editors**

Single-cell analysis is an important technology in the field of cell biology and biomedicine. It highly promotes the understanding of cellular heterogeneity, cell-cell interactions and intracellular changes at the nano/micro scale.

This Special Issue focus on the cutting-edge biosensing technologies for single-cell analysis. We welcome original works, perspectives, and reviews including, but not limited to, the development and applications of sensing technologies, data-processing methods, microfluidic devices and instruments for single-cell analysis.
