### **Message from the Guest Editors**

In recent years, we have witnessed the development of a number of biocatalytic biosensors as end-user and time-saving analytical devices for analyte detection in the fields of food, clinical and environmental sensing. Among all the transduction techniques under consideration, research into biocatalytic biosensors has mostly focused on amperometric devices.

This Special Issue devoted to biocatalytic biosensors (e.g., amperometric, potentiometric etc.) aims to focus on the most recent advances in the development of highly sensitive, selective and stable biosensors for food-related, biomedical and environmental applications.

Deadline for manuscript  
submissions:

**31 December 2024**
