### Message from the Guest Editor

Dear Colleagues,

I am pleased to announce a new Special Issue in *Biosensors* called "Contact Lens Sensors". Wearable devices are increasingly used to monitor users' physiological signals for their health care. Contact lens sensors have been developed as a non-invasive device to investigate ocular diseases and others, such as IOP monitoring for glaucoma patients, glucose monitoring for diabetes, etc. In this Special Issue, we invite researchers to contribute manuscripts that advance the development of contact lens sensing technology.

## Message from the Editor-in-Chief

*Biosensors* is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Chemistry, Analytical) / CiteScore - Q1 (Engineering (miscellaneous))
