### **Message from the Guest Editors**

Dear Colleagues,

Cancer is the second most common cause of death worldwide, with nearly 10 million deaths registered in 2018. The disease represents a high burden physically, psychologically and financially on individuals, families, communities and health systems. Earlier detection and continuous monitoring can lead to a decrease in the death rate and an increase in the quality of life of the patients. In this Special Issue, we will focus on various electrochemical sensor and biosensor platforms for the detection of cancer biomarkers. We seek unique research and development efforts, identifying novel sensing platforms for the detection of cancer biomarkers towards clinical applications.

## Message from the Editor-in-Chief

*Biosensors* is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Embase, CAPlus / SciFinder, Inspec, and other databases.

**Journal Rank:** JCR - Q1 (Chemistry, Analytical) / CiteScore - Q1 (Engineering (miscellaneous))
