

## Special Issue

# Lab on a Chip Technology for Pathogen Detection and Disease Diagnosis

### Message from the Guest Editors

Lab-on-a-chip technology is playing an increasingly fundamental role in pathogen detection and disease diagnosis by offering biosensors with higher sensitivity, lower costs, and the potential to be mass-produced.

This Special Issue calls for papers about new sensing mechanisms, new materials, new micro/nanofabrication processes, new devices, and new applications in lab-on-a-chip technology that are helpful for detecting pathogens such as viruses and bacteria, as well as for enabling disease diagnosis via detecting antibodies, DNA, RNA, exosomes, and cells. All original research or review articles are welcome on both the fundamentals, fabrication, and applications of micro/nanoscale biosensors.

## About the Journal

### Message from the Editor-in-Chief

*Biosensors* is a leading journal, devoted to fast publication of the latest achievements, technological developments and scientific research in the exciting multidisciplinary area of biosensors. Both experimental and theoretical papers are published, including all aspects of biosensor design, technology, proof of concept and application. Special issues are devoted to specific technologies and applications, and a selection of the most outstanding papers each year is recognized. Pushing the boundaries of the discipline, we invite original papers, as well as timely reviews on cutting edge fields within the subject area.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, Ei Compendex, Embase, CAPIus / SciFinder, Inspec, and other databases.

#### Journal Rank:

JCR - Q1 (Instruments and Instrumentation) / CiteScore - Q1 (Instrumentation)

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 20.6 days after submission; acceptance to publication is undertaken in 3.5 days (median values for papers published in this journal in the second half of 2025).
