

Special Issue

Biochips

Message from the Guest Editor

This Special Issue of *Microarrays* will be focusing on Biochip. The understanding of the term “Biochip” shall be an analytical or a diagnostic system using biological or biochemical components, living or not. The system shall also exhibit active functions, such as microfluidic and/or signal transduction. Thus, manuscripts describing cell-on-chip, organ-on-chip, and integrated microarray devices are welcome. Interesting approaches using 3D printing of biochips are also warmly welcome since this is a very hot topic in the field of functional devices prototyping and production. Dr. Christophe A. Marquette

About the Journal

Message from the Editor-in-Chief

Editor-in-Chief

Prof. Dr. Massimo Negrini
Department of Morphology, Surgery and Experimental Medicine,
University of Ferrara, Ferrara, Italy

Author Benefits

High Visibility:

indexed within ESCI (Web of Science), Scopus, PubMed, PMC, Inspec, CAPIus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 18.2 days after submission; acceptance to publication is undertaken in 4.5 days (median values for papers published in this journal in the first half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
