Next Generation Blockchain, Information Security and Soft Computing for Future IoT Networks

Guest Editor:

Dr. Hamed Taherdoost
Department of Arts, Communications and Social Sciences, University Canada West, Vancouver, BC V6B 1V9, Canada

Deadline for manuscript submissions:
31 December 2025

Message from the Guest Editor

This Special Issue will cover all topics of blockchain, information security, soft computing, the Internet of Everything, big data for IoT networks, IoT-enabled unmanned aerial vehicles, software define networks, swarm intelligence, AI/ML/DL for IoT networks, NLP, 6G, Federated Learning and computer vision applications.

This Special Issue topics of interest include, but are not limited to, the following:

- Internet of Things
- MANET, VANET, FANET, SANET and wireless ad hoc networks
- Underwater and underground networks
- Personal area networks, home area networks
- Routing protocols
- Security and privacy
- Machine/Deep Learning for ad hoc networks
- Blockchain technology
- Industrial Internet of Things

Special Issue
