submissions:

10 September 2025

Message from the Guest Editors

Parkinson's disease (PD) is a chronic, complex, and progressive neurodegenerative disease defined by the loss of dopaminergic neurons in the substantia nigra pars compacta, situated in the midbrain and associated with Lewy bodies, which are cytoplasmic inclusions of alpha-synuclein aggregates. Clinical diagnosis of PD is based primarily on motor symptoms, such as a slowly progressive asymmetric resting tremor, rigidity, and bradykinesia. Although non-motor symptoms, which include olfactory deficits, constipation, autonomic dysfunction, depression, and REM sleep behavior disorder, usually precede the presence of motor deficits.

Different factors may influence PD risk such as mitochondrial dysfunction, impaired autophagy, oxidative stress, protein aggregation, neuroinflammation, and environmental and genetic status.

This Special Issue aims to better characterize PD, covering aspects related to the motor and non-motor symptoms that negatively impact health-related quality of life.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 16.2 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the first half of 2025).
