closed (3 June 2024)

Message from the Guest Editors

Dear Colleagues,

Migraine, a complex neurological disorder characterized by recurrent episodes of debilitating headache, has plagued humanity for centuries. Throughout history, the understanding and treatment of this condition have evolved, driven by a continuous quest for relief from the excruciating pain and associated symptoms.

The primary purpose of this Special Issue of *Brain Sciences* is to provide an interdisciplinary platform for scholars, researchers, and clinicians to share insights, discuss novel approaches, and spotlight the latest research findings in the field of migraine clinical and research progress. We aim to offer a comprehensive view of the current state of knowledge and to uncover the most promising frontiers in migraine.

We invite contributions that cover a wide spectrum of topics, including but not limited to clinical trials of emerging treatments, molecular mechanisms underlying migraine attacks, novel drug discoveries, and innovative non-pharmacological interventions. We encourage submissions that offer fresh perspectives and groundbreaking approaches to addressing the multifaceted challenges of migraine.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.
High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYNDEX, CAPlus / SciFinder, and other databases.
Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
