Exploring Negative Symptoms of Schizophrenia: Where Do We Stand?

Guest Editors:

Prof. Dr. Sonia Dollfus

Psychiatry Department,
University of Caen Normandy,
14000 Caen, France

Prof. Dr. Ingrid Melle

Department of Adult Psychiatry,
Institute of Clinical Medicine,
University of Oslo, Oslo, Norway

Dr. Ann Faerden

Department of Acute Psychiatry,
Oslo University Hospital, Oslo,
Norway

Deadline for manuscript
submissions:

25 November 2024

Message from the Guest Editors

Negative symptoms are prevalent among many individuals diagnosed with schizophrenia. Despite their significant impact, negative symptoms have often been overshadowed in diagnostic criteria, treatment approaches, and research pertaining to schizophrenia, especially when compared to positive symptoms. Additionally, there remains a lack of clarity in clinical practice regarding the definition and differentiation between primary and secondary negative symptoms. Recognizing secondary negative symptoms can enable tailored treatment interventions, especially considering the fact that these symptoms can stem from various factors such as positive symptoms, substance abuse, medication side effects, or depressive episodes.

This Special Issue aims to offer fresh insights into negative symptoms by presenting clinical tools, brain imaging studies, physiological data, and innovative treatment modalities, including medications targeting neurotransmitter systems other than dopamine, or exploring adjunctive therapies alongside antipsychotics. Research aimed at enhancing our understanding of the pathophysiology underlying negative symptoms is also encouraged.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience,
University of Pittsburgh,
Pittsburgh, PA 15260, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
