Message from the Guest Editor

We seek in-depth analyses of theories that propose that endocrine, proinflammatory proteins, and related substrates are notably linked to CMD symptoms, especially for populations vulnerable to heightened, chronic, and long-term exposure to stressors. Further, we determine if scarring, vulnerability, and correlational processes occur via perseverative cognitions, emotion regulation, and related factors. To this end, these efforts may optimize depression and related CMD therapies based on immune and endocrine profiles.

In sum, our Special Issue aims to solicit papers that relay an overview or critical evaluation of the transdiagnostic role of immune and endocrine markers in depression and related CMD consistent with the following themes: (1) neuroimaging and prospective studies on the mediators of relations between CMD and immune/endocrine markers; (2) moderator analyses identifying for whom relations between CMD and immune or endocrine markers occur more strongly by examining biopsychosocial moderators; (3) description of clinical applications of current immunopsychiatry and psychoneuroendocrinology theories to optimize cognitive-behavioral and related therapies.

an Open Access Journal by MDPI

Pittsburgh, PA 15260, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
