Message from the Guest Editors

Dear Colleagues,

The diagnosis and management of disorders of consciousness (DoC) due to acquired severe brain injury remain challenging for clinicians. Important information has been obtained on these issues owing to a bulk of functional neuroimaging, advanced electrophysiology, and clinical studies performed on relatively large samples of patients with prolonged DoC and traumatic brain injury. However, there are still few guidelines available for the management of these very fragile individuals. Therefore, improved and innovative diagnostic paradigms, treatment strategies, and management protocols need to be developed and validated. In this Special Issue, we would like to offer readers the latest experimental researches and overviews on these hot topics.

Dr. Antonino Naro

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
