Message from the Guest Editors

Dear Colleagues,

At the Olympics, the World Cup, and various sporting events, the great success of athletes has become a highly deliberated topic; however, at the same time, the injury of athletes unfortunately occurs.

In particular, sports-related neurological diseases have recently received great social attention. The diagnosis, treatment, and management of sports-related concussion in the short term; the impact of repeated concussion on chronic traumatic encephalopathy and degenerative diseases in the long term; and repeated head shock such as heading in the young age group. The effects of these factors are recognized as topics.

Under this perspective, the Special Issue aims to contribute new information to the field, presenting the most relevant advances in this research area.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
