submissions:

closed (20 November 2022)

Message from the Guest Editors

During the Olympics, the World Cup and various other sporting events, the great success of athletes has become a hot topic, but at the same time, unfortunately, the injury of athletes occurs during these events. In particular, sports-related neurological diseases have recently received a large amount of social attention. The diagnosis, treatment and management of sports-related concussion in the short term, the impact of repeated concussion on chronic traumatic encephalopathy and degenerative diseases in the long term, and the effects of repeated head shock such as heading in young age groups are recognized as topics of interest.

From this perspective, this Special Issue aims to contribute to the field, presenting the most relevant advancements in this research area.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience,
University of Pittsburgh,
Pittsburgh, PA 15260, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
