submissions:

closed (5 January 2024)

Message from the Guest Editor

Attachment is a biological emotion regulation-based system guiding cognitive and emotional processes with respect to intimate and significant relationships. Research on the neurobiological basis of attachment started with animal studies. Recently, it has been investigated using an array of different neuroscientific approaches to study several attachment systems (caregiving, sexual, affiliative) as well as mentalization and attachment representations in humans. Most studies focused on healthy populations.

We aim to detail the most recent research in the neuroscience of human attachment: 1) the achievement of an interdisciplinary synthesis of new perspectives and methodologies examining the neuroscience of human attachment in different age groups, including clinical and non-clinical groups; 2) the identification of risk and resilience factors in the intergenerational transmission of attachment in risk groups for a further understanding of biopsychosocial underpinnings; 3) state of the art of neuroscientific approaches to improve the understanding of psychological disorders with a history of adverse attachment experiences and to inform or evaluate attachment-based interventions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2023).
