Deadline for manuscript
submissions:

30 September 2024

Message from the Guest Editor

Dear Colleagues,

Rhythm- and music-based interventions hold promise in managing the clinical symptoms of Parkinson's disease. However, research has predominantly centered on investigating rhythmic auditory cueing for motor function with a limited number of high-quality studies. Rigorous research studies and randomized clinical trials are needed to uncover the neural mechanisms and translate the knowledge into clinical practice, including studies with larger sample sizes and multicenter trials, as well as comprehensive neuroimaging and neurophysiological investigations. Furthermore, there is a need for studies that target the subtypes of Parkinson's disease or address diverse clinical symptoms such as cognition and speech, as well as those stratifying participants based on severity levels and including atypical parkinsonism. Additionally, evaluating novel technologies for home-based interventions and data collection can enhance accessibility and reduce costs. This Special Issue aims to highlight recent advancements in applying rhythm and music to movement disorder interventions, offering insights into evolving interventional options for this challenging condition.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
