### Message from the Guest Editor

Dear Colleagues,

Rare brain monogenic and polygenic disorders, and neurodevelopmental disorders in general, are caused or modified by gene alterations and gene–environment interactions. These disorders of infants and children can determine a series of major and long-lasting abnormalities related to a series of essential neurodevelopmental milestones. Indeed, many genes, genetic variants and gene mutations are possibly linked to neurodevelopmental disorders (NDDs).

In addition, genotype–phenotype correlations, including imaging and neurophysiological assessments, are especially challenging in order to provide an exhaustive picture of the possible clinical progression in most cases.

With this Special Issue dedicated to the publication of any innovative and robust research data, from clinical to bench research investigations of any neurodevelopmental disorder, we aim to provide to clinicians, health care providers, researchers, as well as patients' advocacy groups and families with a valid and reliable instrument of updated information about the most recent findings and discoveries related to brain and brain-related developmental disorders.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).
