Message from the Guest Editor

Dear Colleagues,

Migraine is a primary headache disorder highly prevalent in the general population. Migraine has a constellation of comorbidities, of which the most studied include vascular and psychiatric diseases. However, several neurological disorders, and mostly demyelinating diseases of the central nervous system and epilepsy, can be associated with migraine. Characterizing the comorbidities of migraine and their mechanisms of association can provide useful insights into the pathophysiology of migraine itself and suggestions for treatment in clinical practice. The present Special Issue is dedicated to the neurological comorbidities of migraine, with particular attention of those disorders with potential pathophysiological links to migraine. Both original papers and reviews are welcome.

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
