### Message from the Guest Editor

In recent years, the proportion of the burden of mental illness on contemporary humanity has increased continuously. A series of mental problems, such as stress, anxiety, and depression, have seriously affected people's normal life and brought psychiatry and mental health into public view. Neuropharmacology is the science that studies the mechanism of drug action for the treatment of neurological diseases, and its main task is to guide the rational clinical use of drugs and develop new drugs according to clinical demand.

Thus, the aim of this Special Issue is to explore new drug targets and therapeutic techniques for these psychiatric diseases from pathogenesis. We aim to provide references for neurological drug development. We invite authors to submit review articles or original research articles with a primary focus on the treatment and prevention of relevant neurological disorders.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPus / SciFinder, and other databases.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
