Deadline for manuscript
submissions:

closed (1 January 2024)

Message from the Guest Editors

GABAergic transmission, mediated by GABAergic neurons through local or long-range projections, has been shown to be crucial in sculpting neural networks, refining signal processing, preventing hyperexcitability, and maintaining homeostasis within neural circuits, thus playing a crucial role in the establishment of functional neural networks and the regulation of various neurophysiological and behavioral processes.

Research into GABAergic signaling in postsynaptic neurons and mechanisms that regulate GABAergic neuron activity is crucial for a deeper understanding of brain function in health and disease, and the development of novel therapeutic strategies has aimed to restore and modulate synaptic transmission to improve brain function and treat a wide range of neuropsychiatric disorders. The GABAergic synapse is the site of action of several different classes of drugs and is used in the pharmacotherapy of anxiety and sleep disorders, epilepsy, alcohol withdrawal, and the induction and maintenance of anesthesia.

All kinds of physiology, pharmacology, and pathophysiology studies involving GABAergic circuits and behaviors regulated by GABAergic transmission are welcome.

an Open Access Journal by MDPI

Pittsburgh, PA 15260, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
