Deadline for manuscript
submissions:

closed (15 November 2022)

Message from the Guest Editors

Endogenous opioids have been implicated in feeding, but the role of each opioid peptide and receptor is less clear in this regard. In particular, the role of the endogenous opioid system in the hedonic aspect of feeding and food addiction is not fully characterized. This Special Issue aims to publish breakthrough findings encompassing the role of the endogenous opioid system in the homeostatic and hedonic aspects of feeding, as well as in glucose and energy homeostasis, how palatable foods affect the level of opioid peptides and their receptors, the role of neuroanatomical site(s) of regulatory actions of opioids in the brain in the homeostatic and hedonic aspects of feeding, and where, in brain regions, palatable foods alter the levels of opioid peptides and their receptors.

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience,
University of Pittsburgh,
Pittsburgh, PA 15260, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
