Advances in Restorative Neurotherapeutic Technologies

Guest Editors:

Dr. Vivek P. Buch

Department of Neurosurgery,
Stanford University, Stanford, CA
94305, USA

Dr. David Arnold Purger

Department of Neurosurgery,
Stanford University, Stanford, CA
94305, USA

Deadline for manuscript
submissions:

closed (31 May 2024)

Message from the Guest Editors

From Ramon y Cajal and Golgi's histological techniques to single-cell RNA sequencing, technological innovations have long driven progress in the neurosciences. We are entering an era in which new technologies have the power not only to help us understand the inner workings of the brain or to treat the symptoms of the diseases that plague it but also to restore function to those affected by disorders of the central nervous system. From individualized network-based neuromodulatory therapies for neurologic and psychiatric disease to the brain-computer interfaces to restore movement in quadriplegics and to restore vision for the blind, cognitive prosthetics for dementia and learning disabilities, seizure-detecting responsive neurostimulators, augmented reality headsets to help neurosurgeons locate brain tumors and wearable electric field-generating devices to help limit their growth and many more.

This Special Issue explores some of the technologies, including the potential not only to restore but to augment nervous system function and improve the quality of life for patients who have exhausted traditional therapies.

Special Issue

an Open Access Journal by MDPI

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience,
University of Pittsburgh,
Pittsburgh, PA 15260, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
