submissions:

closed (20 May 2022)

Message from the Guest Editor

Research investigations in substance use initiation and use among developing populations (pre-adolescents, adolescents, and young adults in transitional age) has expanded in the last couple of decades. This has become partially possible due to advancements in novel and safe techniques able to index physiological changes in the developing brain as well as the creation of large-scale naturalistic studies providing a wealth of information about psychological and physiological changes in the brain. The goal of this Special Issue is to present some of the most recent findings from prestigious research teams that have been leaders in the field of adolescent substance use. We are soliciting submissions from teams working in neurophysiology and brain neuroimaging that investigate both markers of risk for SUD development and the effects of treatment interventions.

an Open Access Journal by MDPI

Pittsburgh, PA 15260, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
