### **Message from the Guest Editor**

We welcome original research studies (open trials, randomized controlled trials), meta-analyses, reviews, and commentaries. Of special interest are studies related to novel uses of brain neuromodulation and stimulation, neurosurgical procedures, psychedelic compounds, novel medicines, anti-inflammatory strategies, virtual reality, wearable technologies, genetics, gut microbiota, artificial intelligence, longitudinal tracking and monitoring, and combination treatments. We will also consider studies related to psychotherapeutic interventions and public health policies.
