### Message from the Guest Editors

The prevalence of Parkinson's disease, and thus the burden of the associated non-motor symptoms will increase in future years, because of the secular trends in the age-structure of populations. The detection and, if possible, prevention, of cognitive impairment associated with Parkinson's disease is of the utmost importance for future generations, in terms of healthcare costs, social care, and the prevention of morbidity and mortality. As both Parkinson's disease and Parkinson's disease dementia are more common in older adults, the focus of cognitive decline is particularly important in this age group. We therefore welcome studies specifically focussing on older adults and associated cognitive change in the disorder.

Deadline for manuscript submissions:

**closed (23 December 2019)**

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

**Rapid Publication:** manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
