University of Illinois at Chicago,
Chicago, IL 60612, USA

Message from the Collection Editor

Dear Colleagues,

This collection on system neuroscience is dedicated to the research and exploration of multifactorial and multidimensional processes, such as normal and pathological aspects of sensory and motor functions; the activity of limbic and cognitive systems; and cerebral control of homeostasis, locomotion, reproduction, etc. By building a bridge between various theoretical concepts, basic science research, and clinical medicine applications, the “System Neuroscience” section of the journal provides an in-depth analysis of the intricate workings of the nervous system. The focus of this collection goes beyond isolated aspects of neuroscience research and dedicates itself to a more comprehensive view of neural mechanisms and functionality.

Prof. Dr. Konstantin V. Slavin

Guest Editor

an Open Access Journal by MDPI

Editor-in-Chief

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
