Deadline for manuscript
submissions:

closed (20 April 2021)

Message from the Guest Editor

Epilepsy surgery constitutes a rapidly evolving scientific field. Advanced imaging techniques, hybrid imaging and electrophysiological modalities, and innovative invasive electrophysiological methods have been employed in the evaluation of patients suffering from medically intractable epilepsy of various etiologies. Moreover, novel surgical strategies have been implemented in the management of these patients with promising results. All these emerging surgical treatment options along with respective and disconnecting surgical methods represent valuable tools in the management of these patients. The overall seizure outcome, along with the cognitive and the neuropsychological outcome, have to be accurately evaluated in order to further increase the safety and efficacy of each surgical method.

University of Pittsburgh,
Pittsburgh, PA 15260, USA

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, CAPlus / SciFinder, and other databases.

Rapid Publication: manuscripts are peer-reviewed and a first decision is provided to authors approximately 12.9 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the first half of 2024).
