Translational Omics in Neurodegenerative and Neurodevelopmental Disorders

Message from the Guest Editors

Recent high-throughput technologies have significantly extended the domains of genome, epigenome, transcriptome, proteome, and metabolome in neuropathogenesis. Certainly, these omics data can be integrated to define the relationship at various biological states from genome to metabolome, thereby accelerating research that aimed at identifying biomarkers, pharmaceutical targets, and personalized drugs and treatment by uncovering the mechanisms behind complex neurodevelopment disorders and neurodegenerative diseases. The Special Issue of *Brain Sciences* aims to provide recent breakthrough research on multi-omics translational regulation in neurodegenerative and neurodevelopment disorders. We invite authors to submit their findings in the following version: research articles, short communication reports, and review articles on the translational application for the above-mentioned Special Issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Department of Neuroscience, University of Pittsburgh, Pittsburgh, PA 15260, USA

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
