Autism Spectrum Disorders (ASD) in Low- and Middle-Income Countries (LMICs) and among Immigrants and Minority Groups in High-Income Countries (HICs)

Message from the Guest Editor

Globally there is a rising rate of autism spectrum disorder (ASD). However, the increasing global wealth of knowledge on ASD is primarily based on different studies conducted in developed, affluent countries. This situation is partly a result of a lack of epidemiological and service research in the field of mental health in general and ASD in particular in LMICs. The irony is that the demographics of the global human population are tilted so that most (up to 80%) of world children and youth live in LMICs. A similar shortage of studies reported ASD studies among immigrants and minority groups in high-income countries (HICs). There is evidence of ethnic and racial differences in ASD prevalence and services access even among the HICs and developed societies. Delayed diagnosis is another crucial issue for immigrant children from LMICs to HICs. Within HICs, individuals from high socioeconomic backgrounds are mainly represented in ASD research. The high cost of researching ASD contributed to this imbalance in LMICs.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Stephen D. Meriney

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
