

Special Issue

Brain Stimulation and Neuroplasticity

Message from the Guest Editors

Non-invasive brain stimulation methods have emerged as diagnostic and therapeutic tools over the recent years. This special issue aims at gathering pre-clinical and clinical data on brain stimulation techniques (electrical and magnetic stimulation methods). This special issue compiles newest research on clinical and neurophysiological application of brain stimulation methods and the impact of brain stimulation on imaging outcomes, neurobiological markers, and clinical variables (including neurological, affective and cognitive measures). We are encouraging to submit review articles, case reports and case series, pilot studies, and randomized controlled clinical trials.

Author Benefits

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).

Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
