

## Special Issue

# Social Cognition across Healthy and Neuropsychiatric Conditions

### Message from the Guest Editor

Social cognition refers to perception, interpretation and response to behavior of others, an umbrella term covering multiple subdomains, including emotion perception, theory-of-mind, empathy and moral processing. Research on emotion perception traditionally focused on facial expressions, with more recent emphasis on body perception. Theory-of-mind is typically not considered from a stimulus modality perspective, but from a complexity perspective. Much remains to be revealed regarding fundamental and neural underpinnings of social cognition. Especially for normal social cognition, and deficits in social cognition occurring across neuropsychiatric conditions.

Associations between deficits in social cognition and neuropsychiatric disorders is increasingly recognized, accompanied by growing research interest in neural basis and its breakdown in psychiatric conditions. This Special Issue aims to present current findings and perspectives on normal and abnormal social cognition, aiming to advance the knowledge on its fundamental, neurobiological and pathological basis. Relevant work includes computational, human, non-human or clinical empirical or theoretical studies and opinions.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 15.6 days after submission; acceptance to publication is undertaken in 1.9 days (median values for papers published in this journal in the second half of 2024).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
