## Vestibular Neurology

### Message from the Guest Editors

The diagnosis and management of dizziness and vertigo remains a challenge worldwide, with a relative paucity of vestibular neurologists, and a real need to translate findings from vestibular neuroscience into the clinical arena. There remains a knowledge gap in understanding the neurobiology of vestibular disorders, from syndromes of “unexplained dizziness” in the elderly through to variants of benign paroxysmal positional vertigo (BPPV), vestibular migraine, and more persistent symptomatic states such as persistent postural perceptual dizziness. Finally, vestibular neurology is rich in clinical bedside skills; indeed, an evaluation of eye movements may more precisely identify and localise a stroke than state-of-the-art imaging. The aim of this Special Issue is to provide novel insights from clinical and basic research perspectives on vestibular neurology and neuro-otology. A non-exhaustive list of potential papers may include research involving the use of neurophysiology techniques, genetics, pharmacological therapy, physical therapy, psychological intervention in clinical populations, as well as preclinical studies with animal models.

---

### Guest Editors

Dr. George S. Korres

Consultant in Neuro-otology and Audiovestibular Medicine, Attikon Hospital, University of Athens – Honorary post, Leicester University Hospitals, Leicester, UK

Prof. Dr. Diego Kaski

Centre for Vestibular and Behavioural Neurosciences, University College London, London, UK

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Brain Sciences* (ISSN 2076-3425). *Brain Sciences* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on neuroscience. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, PSYINDEX, PsycInfo, CAPlus / SciFinder, and other databases.

#### Rapid Publication:

manuscripts are peer-reviewed and a first decision is provided to authors approximately 17.6 days after submission; acceptance to publication is undertaken in 2.5 days (median values for papers published in this journal in the second half of 2025).

#### Recognition of Reviewers:

reviewers who provide timely, thorough peer-review reports receive vouchers entitling them to a discount on the APC of their next publication in any MDPI journal, in appreciation of the work done.
