

## Ventilation and Air Quality in Buildings

Guest Editors:

**Dr. Xiong Shen**

Tianjin Key Laboratory of Indoor Air Environmental Quality Control, School of Environmental Science and Engineering, Tianjin University, Tianjin 300072, China

**Dr. Priya Vishnu**

School of Built Environment, Massey University, Auckland 0632, New Zealand

**Dr. Daniel Bishop**

Department of Civil & Natural Resource Engineering, University of Canterbury, Christchurch 8041, New Zealand

Deadline for manuscript submissions:

**31 August 2024**

### Message from the Guest Editors

Dear Colleagues,

This Special Issue mainly assembles the novel findings regarding the ventilation and IAQ in buildings. The scope of the work includes, but is not limited to, the following:

- Ventilation;
- Air distribution systems;
- Insulation;
- Thermal comfort;
- Measurement;
- Simulation;
- BIM;
- Heating–cooling demand.

This Special Issue will be edited by researchers in the field of architecture from China and New Zealand. The submission deadline for this Special Issue is 31 August 2024. This Special Issue belongs to the Building Energy, Physics, Environment, and Systems.

## Editor-in-Chief

### Prof. Dr. David Arditi

Construction Engineering and Management Program,  
Department of Civil,  
Architectural, and Environmental  
Engineering, Illinois Institute of  
Technology, 3201 South  
Dearborn Street, Chicago, IL  
60616, USA

## Message from the Editor-in-Chief

Current urban environments are home to multi-modal transit systems, extensive energy grids, a building stock, and integrated services. Sprawling neighborhoods are composed of buildings that accommodate living and working quarters. However, it is expected that the cities and communities of the future will face complex and enormous challenges, including maintenance, interconnectivity, resilience, energy efficiency, and sustainability issues, to name but a few. A smart city uses advanced technologies and a digital infrastructure to improve the outcomes in every aspect of a city's operations. A smart building optimizes the experience of occupants, staff, and management by using a modern and connected environment. Innovations in technology that can bring dramatic improvements to design, planning, and policy are critical in developing the cities and buildings of the future.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), Inspec, and other databases.

**Journal Rank:** JCR - Q2 (*Engineering, Civil*) / CiteScore - Q1 (Architecture)
