Deadline for manuscript  
submissions:

**9 April 2025**

### Message from the Guest Editors

Endometrial cancer (EC) is the sixth most common cancer to affect women worldwide and the most prevalent gynecologic malignancy in American women. Although EC is curable when found and treated early, the 5-year overall survival rate for stage IV EC is only 15–17%. In recent years, EC's incidence and mortality rates have been increasing. According to the American Cancer Society, about 67,880 new cases are expected in 2024, the management of which requires a deeper understanding of the disease pathophysiology and an advanced discovery of strategies for early diagnosis.

Thus, this Special Issue aims to discuss diagnosis, novel prognosis biomarkers, and recent advancements in disease management. We welcome for submission to this Special Issue original research articles and reviews. Research may include basic, translational, and clinical studies.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
