Deadline for manuscript
submissions:

closed (10 September 2023)

Message from the Guest Editors

Dear Colleagues,

Malignant pleural mesothelioma (MPM) is a rare and aggressive cancer associated with asbestos exposure, and its incidence is increasing globally. The complex biology of MPM is poorly understood, and the largest genomic studies to date have demonstrated that mesothelioma is primarily defined by loss-of-function alterations in tumor-suppressor genes. This Special Issue will describe new developments in the field of biology with genomics and highlight the most relevant data from clinical trials regarding recent treatment strategies for MPM, with a particular focus on immunotherapeutic and targeted approaches.

For this Special Issue of *Cancers*, we invite you to submit original research or a comprehensive review of the state of art of MPM research, including, but not limited to:

- Histological and molecular characteristics;
- Radiology and tumor response;
- Surgery;
- Molecular alterations;
- The tumor microenvironment;
- Targeted agents;
- Cellular therapies;
- Predictors of response to immunotherapy;
- Further trials of interest and future perspectives.

We look forward to receiving your contributions.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
