Message from the Guest Editors

Dear Colleagues,

Pancreatic cancer is a devastating disease with a 5-year survival rate of just 11% in the USA. It accounts for just 3% of all cancer cases but shares 7% of the total cancer-related deaths. There are several factors responsible for the high mortality of pancreatic cancer patients, such as: late detection, early metastasis, therapy resistance, and cancer-associated cachexia. In the last decade, despite the advancement of our knowledge on the pathogenesis of pancreatic cancer, much remains unexplored regarding the disease progression. A better understanding of the pathogenesis of pancreatic cancer may lead to better management of the disease, leading to improved survival of patients. The aim of the proposed Special Issue is to publish cutting-edge research articles and relevant review articles, which can help to improve our understanding of the progression of pancreatic cancer. I hope this Special Issue will be very useful for the research community and care providers.

an Open Access Journal by MDPI

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
