Message from the Guest Editor

In recent years, enormous progress has been achieved in the diagnosis and treatment of gynecological diseases. Transvaginal ultrasound has now attained diagnostic sensitivities that are superimposable, if not superior, to 'traditional' instrumental investigations. Furthermore, surgical and medical treatment of gynecological pathologies have evolved toward increasingly personalized medicine. The advancement of knowledge has led to the molecular characterization of gynecologic pathologies for better understanding the pathology itself, allowing targeted and personalized therapies. Finally, new research has led to increasingly less invasive surgery in both oncology and benign pathology.

Despite this impressive medical advancement, many questions still remain unresolved. The weight of molecular characterization versus pathological prognostic criteria in endometrial cancer, the role of minimally invasive surgery in cervical cancer, and the role of new maintenance therapies in ovarian cancer recurrence deserve to be better understood.

The purpose of this Special Issue is to provide new insights into the future frontiers of scientific research in gynecology from diagnosis to treatment.

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
