Deadline for manuscript  
submissions:

**closed (25 October 2024)**

### Message from the Guest Editor

Dear Colleagues,

Inflammation is often closely related to tumorigenesis and is a recognized hallmark of cancer. It has been widely reported that inflammatory processes modulate the course of cancer by stimulating or inhibiting its growth. Cancer development and its response to therapy are regulated by inflammation, which either promotes or suppresses tumor progression.

A deeper understanding of common pathways, implicated between inflammation and cancer, may pave the way to the introduction of new diagnostic and novel therapeutics.

This Special Issue invites papers that cover all aspects of the role played by inflammation in cancer development and progression.

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
