### Message from the Guest Editors

This Special Issue will focus on recent advances in the efficacy/safety profile of PD-1/PD-L1 blockade in cancer treatment, from biomarker-driven therapy to novel radiopharmaceuticals (immuno-PET radiotracers) and drug combinations. Evidence on the role of optimized combination detection markers to further improve the accuracy of PD-L1 in predicting the efficacy of PD-1/PD-L1 blockades and the application of artificial intelligence techniques in the field of personalized immunotherapy will be also welcomed.
