submissions:

**closed (5 September 2024)**

### Message from the Guest Editor

Following advances in cancer therapy, the majority of young adults will become long-term cancer survivors. Young cancer survivors experience a higher risk of infertility than the general population. Prior studies have shown that potential loss of fertility can be as painful as the cancer diagnosis itself. Thus, it is mandatory to carry out a fertility consultation before starting antineoplastic treatments.

Fertility counseling before cancer treatment aims to inform patients and families about their future fertility potential and to facilitate the preservation of fertility. The purpose of this Special Issue is to improve knowledge on the gonadotoxicity of oncological and radiotherapy treatments in order to choose and customize the most suitable fertility preservation techniques for people.

Furthermore, this collection aims to evaluate the outcomes of spontaneous pregnancies and from in vitro fertilization techniques arising in cancer survivors and perinatal and pediatric follow-up of the births in order to compare them with the general population.

an Open Access Journal by MDPI

## Editor-in-Chief

**Prof. Dr. Samuel C. Mok**

Department of Gynecologic  
Oncology and Reproductive  
Medicine, The University of Texas  
MD Anderson Cancer Center,  
Houston, TX 77030, USA

## Message from the Editor-in-Chief

*Cancers* (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
