Deadline for manuscript  
submissions:

**closed (30 December 2024)**

### Message from the Guest Editor

Dear Colleagues,

Leukemias are malignant disorders of the blood and bone marrow. Epigenetic and transcription alterations play substantial roles as key functions of leukemia stem cells, such as self-renewal and resistance to standard therapy. A better understanding of epigenetic and transcriptional aspects of leukemogenesis will shed light on new diagnostic and therapeutic approaches, thus greatly improving the outcomes of patients with hematological malignancies.

This special Issue will focus on epigenetic findings elucidating the molecular mechanisms of the development, progression and therapeutic resistance of leukemia. Original research or review articles related to oncogenesis, prognosis, new therapeutic approaches and treatment resistance are welcome.

Dr. Yi Qiu

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
