Deadline for manuscript  
submissions:  
**closed (31 July 2023)**

### Message from the Guest Editor

Dear Colleagues,

Extracellular vesicles (EVs) are a heterogeneous group of membrane-bound vesicles secreted by cells across all living kingdoms. They take part in cell-to-cell communication, and the mechanisms, messages and efficiency of this exchange system are currently under extensive investigation as they are involved in multiple physiological as well as pathological processes.

Remarkably, EV secretion appears to be augmented in tumor cells and has a relevant role in cancer progression, offering a highly effective way to modulate the tumor microenvironment, contributing to the formation of pre-metastatic and metastatic niches and participating in the tumor-immune landscape cross-talk.

This Special Issue of *Cancers* seeks original articles and review manuscripts focused on (1) analyzing tumor EV cargo, (2) EV function in tumor-microenvironment interplay, (3) the role as modulators of pre-metastatic and metastatic niches across cancer types, (4) EVs' influence on immune surveillance against tumors and finally (5) EV-based biomarkers and therapeutic development in cancer research.

## Message from the Editor-in-Chief

*Cancers* is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

## Author Benefits

**Open Access:** free for readers, with article processing charges (APC) paid by authors or their institutions.

**High Visibility:** indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

**Journal Rank:** JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
