Message from the Guest Editors

Dear Colleagues,

Surgical decompression and stabilization procedures for patients with metastatic spine tumors have been well supported since the publication of the Patchell study in 2005. A parallel body of literature has also grown to support en bloc resection for primary spinal tumors (such as chordoma). As surgeons incorporate these recommendations, it is critical to consider the recent advances in radiation and chemotherapy.

This Special Issue seeks to review medical, radiation, and surgical advances that impact the treatment of spine tumors. Original research articles and reviews are welcome. We look forward to receiving your contributions.

Prof. Dr. Ziya Levent Gökaslan

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
