Message from the Guest Editors

The goal of this Special Issue is to bring basic scientists and clinical investigators together to explore problems and challenges regarding BC immunotherapy. Special considerations would be given to findings of new mechanisms of tumor immune microenvironment, immune evasion, immune cell functions, immunotherapy resistance, and novel combination strategies in BC. We expect that this topic would provide new insight into BC biology and facilitate innovative approaches to improve the outcomes of immunotherapy in breast cancer.

Message from the Editor-in-Chief

Cancers (ISSN 2072-6694) is an international, online journal addressing both clinical and basic science issues related to cancer research. The journal will continue its open access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q2 (Oncology) / CiteScore - Q1 (Oncology)
