Informatics, Taipei Medical
University, Taipei, Taiwan

Deadline for manuscript
submissions:

closed (20 June 2023)

Message from the Guest Editor

Dear Colleagues,

Artificial Intelligence of Things (AIoT) is the combination of artificial intelligence and the Internet of Things (IoT) and has opened a wide range of opportunities for healthcare advancements. Wearable devices, non-contact sensors, and m-health technologies are some examples of the IoT which, when connected to the internet, can collect valuable medical data. These data can provide insights about the symptoms, the patterns, and variations, enable remote care and monitoring, and encourage participatory health care among patients. Non-contact sensors are gaining popularity in clinical settings. Application of artificial intelligence (AI) algorithms on the data collected from IoT devices can help in prediction, early detection, and better management of diseases. These models can assist healthcare professionals in decision making and formulating better care plans for patients. Thus, artificial intelligence has a wide range of applications for healthcare data from IoT devices.

This SI will focus on the opportunities and implementation challenges of AIoT wearable devices for the homecare of patients with cancer.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
