Deadline for manuscript submissions:

5 November 2024

The tumor microenvironment (TME) is the complex non-cancerous cellular and non-cellular compartments presented in and around the tumor, including fibroblasts, immune cells, adipocytes, and cells that comprise the blood vessels. It has been shown that cancer cell plasticity and stemness are modulated by biochemical and biophysical cues derived from the TME, which in turn promotes cancer metastasis and therapeutic resistance. Cancer cells also produce a variety of growth factors and chemokines to modulate the function of these cells. Targeting the TME has proven to be a promising strategy for cancer therapy. Angiogenesis inhibitors have been approved by the FDA for the treatment of solid tumors. Therefore, further elucidating the molecular and cellular biology of TME in cancer development and progression is critical for us to eventually eliminate cancer-related death. This Special Issue will highlight the current state of the art in the function and regulation of cancer-associated fibroblasts, adipocytes, immune cells, ECM remodeling, and prospects for improving TME-related therapies.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
