Message from the Guest Editor

Dear Colleagues,

Prostate cancer is generally viewed as a slow-growing unaggressive cancer, yet it is one of the most commonly diagnosed cancers and a leading cause of morbidity and mortality in men around the world. Over the last few years, the management of advanced prostate cancer has evolved tremendously, leading to new therapeutic options that have helped to improve survival and quality of life. All of this success is due to intensive research that has gone from preclinical models and through the phases of clinical research to eventually lead to what we now have to offer. This Special Edition looks to cover what is presently available and how best to use these therapeutic options in advanced/metastatic castration-sensitive as well as castration-resistant prostate cancer. This issue will address ongoing basic and clinical research that may lead to new therapies but also how to better use the options we have at our disposal, whether it be in terms of timing, combination, and sequencing. This issue will also look to include the exponential growth of molecular imaging and radioligand therapy over the past few years.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
