Message from the Guest Editors

Dear Colleagues,

In the last few decades, scientific community has identified the immense potential of bioactive dietary nutrients/components in the treatment and/or prevention of cancer. Other anti-tumor aspect of these dietary nutrients can be correlated with their inhibitory effects on inflammatory mediators or cytokines. To develop effective cancer treatment strategy based on dietary molecules, it is essential to understand how these molecules interact with their respective oncogenic targets and the underlying molecular mechanism(s). Research findings from such explorations will stimulate the scientific community for designing novel anti-tumour drugs with advanced formulation for clinical testing. The purpose of the present issue is to invite researchers for contributing original research and review articles in the field of medicinally important bioactive nutrient molecules along with their tumor preventive action.

Message from the Editor-in-Chief

Cancers is an international online journal addressing both clinical and basic science issues related to cancer research. The journal is publishing in Open Access format, which will certainly evolve to ensure that the journal takes full advantage of the rapidly changing world of information and knowledge dissemination. It publishes high-quality clinical, translational, and basic science research on cancer prevention, initiation, progression, and treatment, as well as other related topics, particularly to capture the most seminal studies in the rapidly growing area of immunology, immunotherapy, and tumor microenvironment.

Author Benefits

Open Access: free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility: indexed within Scopus, SCIE (Web of Science), PubMed, PMC, Embase, CAPlus / SciFinder, and other databases.

Journal Rank: JCR - Q1 (Oncology) / CiteScore - Q1 (Oncology)
